

Pencolor

Technical Data Sheet

Product description

Penguin Pencolor is a paste with enriched color pigment that can be used with water-based paints. It is produced in 24 main color shades and different color shades can be obtained by increasing-decreasing the amount of pastes.

Sphere of usage

It can be used to paint water-based paints. Color paste and paint must be mixed separately before usage, then paste must be poured into paint and mix together until they become homogenous.

Physical specifications

Color	24 main colors
Density (gr/cm³)	1.50±2 (Depends on color)
Viscosity	90±5

Surface preparation

Surface must be cleaned from dust, dirt, oil substances and old paints.

Storage conditions

Paint must be stored without opening in dry, cool, good ventilated places where there is not any risk for high temperature and sparks. It is recommended to mix the paint before usage.

Packing types

Paint is produced in 0.05 l, 0.3 l and 0.6 l plastic containers.

Health and safety rules

Follow the rules on the containers. Store in depots where there is not any risk for high temperature and sparks. Use in good-ventilated places. If there is a contact with paint, first clean it with proper solvent and then wash skin with water and soap. If eyes contact with paint, it must be cleaned water and doctor intervention is important.
